They both make a buzzing sound. They both have wings and they can both fly. When wasps are larvae (کرم) they are parasites. They feed on (تغذیه کردن) dead insects. Adult wasps will eat nectar. Bees only feed on nectar and pollen from plants. Bees are not parasitic. There are over 100,000 different types of wasps in the world. There are wasps on all continents except Antarctica .</p> <p>continent ( قاره ) except (بجز)</p>	۱۱

۵	<p>The most common kind of wasp in Canada is the yellow jacket. Some kinds of wasps are social(اجتماعی). Social wasps live in colonies. There can be thousands of wasps in a colony. Each colony has a queen wasp and many female (مونث) workers. In mild climates the colonies only live about a year. The queen wasp sleeps in cracks or other protected areas over the winter but most of the other wasps die. The queen starts a new colony in the spring.</p> <p>Some kinds of wasps sting(نیش زدن) but others do not. It is the female wasp that has a sharp stinger.
